

Welly Oktariana, S.T

Data Analyst | Data Scientist | Geospatial Analyst

South Tangerang, Banten | 0822-4767-8101 | wellyoktariana08@gmail.com | <https://www.linkedin.com/in/wellyoktariana/>
Portfolio: <https://wellyokt.github.io/portofolio-welly/>

SUMMARY

Data Analyst 2+ years of experience in building machine learning models, performing spatial analysis, and leveraging data visualization techniques to deliver actionable insights that support strategic decision-making and drive business outcomes. Strong interest in data processing and analysis, with hands-on experience working with both large-scale and small datasets across various contexts. Adept at combining spatial and non-spatial data to uncover patterns, identify trends, and translate complex information into clear business recommendations.

EDUCATION

DIBIMBING.ID

AI Machine Learning

Oct 2024 - Mar 2025

- Machine Learning & AI: Supervised and Unsupervised Learning, Feature Engineering, Hyperparameter Tuning.
- Advanced Techniques: Ensemble Learning, Time Series Modeling, PCA, and RFM Analysis.
- Deep Learning : Computer Vision, NLP, OCR, and Recommendation Systems.

INSTITUT TEKNOLOGI SUMATERA

Bachelor of Geomatics Engineering

Lampung Selatan, Lampung

2016 - 2020

GPA: 3.17/4.00

Thesis : The affect of tides on the coastline about with concerning the boundaries of regional sea authority.

PROFESSIONAL EXPERIENCES

PT. Bhumi Varta Technology

Data Analyst

May 2023 - present

- Gathered, cleaned, validated, and preprocessed structured and unstructured data from diverse sources; designed and implemented automated validation workflows using random variables and logic-based checks, reducing manual efforts and enhancing data accuracy and consistency.
- Performed in-depth exploratory data analysis (EDA) on business, geospatial, demographic, and telecommunications datasets to identify uncovered trends, patterns, anomalies, and market opportunities. Translate data findings into actionable business insights and client expansion strategies.
- Developed and trained machine learning models (including regression, classification, clustering, and sentiment analysis) to address key business challenges; optimized performance through iterative hyperparameter tuning and ongoing monitoring to maintain accuracy.
- Designed and built interactive dashboards and visual reports using Streamlit, HTML, and Power BI and effectively communicated insights, trends, and performance metrics to stakeholders.
- Collaborated closely with data engineers, analysts, business teams, and stakeholders to ensure seamless data integration and translate complex challenges into actionable solutions.

GIS Technician

Oct 2021 - April 2023

- Led the preparation of POI (Point of Interest) data, including data collection, cleaning, and structuring.
- Initiated concepts and methodologies for POI data validation to ensure accuracy and consistency across projects.

- Trained team members on data preparation standards, validation methods, and workflow processes.
- Monitored project progress, facilitated team discussions, and provided guidance to ensure smooth operations.
- Conducted quality control and validation of datasets, ensuring data reliability and alignment with client requirements.

Badan Pendapatan Daerah DKI Jakarta

October 2020 - September 2021

Mapping Surveyor

Coordinated PBB mapping activities in Palmerah District, including verifying and processing PBB-P2 tax data, and providing progress reports to the Field and Regional Managers.

SKILLS

- **Programming:** Python (Pandas, Geopandas, NumPy, Scikit-learn, TensorFlow), SQL
- **Data:** Feature Engineering, EDA, Data Cleaning, Data Modeling
- **Machine Learning:** Regression, Classification, Clustering, Time Series, CNN, LLM
- **Tools & Development:** Git
- **Visualization & Reporting:** Matplotlib, Seaborn, Plotly, HTML Report, Streamlit, Power BI
- **Soft Skills:** Communication, teamwork, leadership, initiative, analytical, logical, and problem-solving thinking.
